

*Aftermarket Sunroofs.  
Get that open-air feeling.*

■ More light    ■ More fresh air    ■ More driving fun

[www.open-air-feeling.com](http://www.open-air-feeling.com)

## *Webasto roof systems.*

If you are on the road in your car, you want to experience maximum comfort. What can be better than feeling the sun on your skin, breathing fresh air and enjoying the feeling of freedom? With Webasto roof systems, you can fulfil this desire – you can experience every trip with all your senses!

With one of the many different Webasto sunroofs – open or closed – you can enjoy comfort and a vehicle interior that is bathed in light 365 days a year. At the same time, Webasto roof systems provide high quality and reliable safety technology. You can already look forward to clear advantages:

Light

Fresh air

Driving fun

Quality

# Clear as daylight: The advantages of a sunroof.

## ***Bright minds want light.***

The number-one feel-good factor will always be light. Enjoy it as often as possible. A sunroof makes all happy with noticeably increased brightness – the appearance of an open vehicle interior immediately provides a much more pleasant atmosphere.

## ***Fresh breeze for your driving performance.***

With fresh air, your driving becomes significantly more relaxed, more concentrated and thus more safe. A sunroof means no draughts when the side window is open; rather the air comes evenly and pleasantly from above.

## ***Every kilometer is a joy.***

Every year, five million factory-fitted Webasto roof systems throughout the world open new perspectives for car drivers: a real open-air feeling, pure driving fun, as well as that very special feeling of freedom.

## ***Great perspectives in regard to quality.***

With Webasto roof systems, you can look not only upwards, but also assuredly forwards: Thanks to our TÜV-inspected top quality in the retrofit sector, we provide a 3 year warranty on all of our roof systems.

# All-round quality: Roof systems for every need.

## Family enterprise since 1901.

For more than 100 years, Webasto has stood for comfort and quality and is Number 1 in the world for automobile roof systems. From classic tilt and slide roofs to lamella and solar roofs to panorama roofs and innovative convertible roofs – Webasto reliably provides millions of car drivers with more driving fun.

### Convertible roof systems that fulfil every desire.

This is top quality in the truest sense of the word. From retractable hardtops with up to 5 parts to technically advanced soft tops: Webasto's innovative convertible roof systems have made us Number 1 on the market. This position was strengthened in 2010 by our merger with the convertible specialist Edscha.

### We build on innovation ex works.

Throughout the world, Webasto develops and produces roof systems for new cars. Here, we use innovative products, such as the first solar sunroof or the novel convertible roof system with an integrated sliding glass roof – used in the VW Eos – which combines the advantages of a convertible with those of a sunroof.

### Especially popular in special editions.

Sometimes things have to be special. In order to give their customers something special, well-known automobile manufacturers use high-quality Webasto roof systems in their special editions.

### From a used car to a dream car.

Fall in love again with your used car! Regardless of whether it is a compact car, a mid-sized or a limousine – when it is retrofitted with one of our varied roof systems, you will ensure that you will bask in the limelight within your car.

## *A great feeling in a small space.*

Compact car drivers do not have to do without the great feeling of freedom. Quite the contrary: They gain the most advantages when retrofitting a Webasto roof system. The car opens up visually and thus appears to be significantly larger.

Retrofit your compact car with one of our roof systems, and look forward to sunshine, fresh air and many enjoyable trips.

## *Special edition successes.*

In regard to their exclusive special editions, automobile manufacturers give their customers only the best things: love for details, the highest quality and very special extras. Desires that are united and perfected in Webasto roof systems, which are being used more and more as an absolute highlight in special editions.

For example, the Hyundai i10 is exciting with its Hollandia 300 and Hollandia 400, as is the VW Fox with the Hollandia 400. Webasto is also setting new standards in the compact car segment in this regard.

Hollandia 400 (soft top)

## *The trust of grand brands.*

Like many famous automobile manufacturers, you can put your trust in the excellent quality of Webasto.

Our roof systems are installed at the works of, for example: Alfa Romeo, Aston Martin, Audi, Bentley, BMW, Buick, Cadillac, Chevrolet, Chrysler, Citroën, Daihatsu, Dodge, Ferrari, Fiat, Ford, GM, Great Wall, Honda, Hyundai, Infiniti, Lamborghini, Lancia, Land Rover, Lincoln, Maserati, Maybach, Mazda, Mercedes-Benz, Mitsubishi, Nissan, Opel, Peugeot, Porsche, Renault, Rolls Royce, SAIC, SEAT, Škoda, Smart, Subaru, Suzuki, Toyota, Volvo and VW.

# Real eye-catchers: Webasto retrofit roof systems.

## Hollandia 100

**Big effect – small price.**

A generous feeling of well-lit space and the pleasant enjoyment of fresh air: The Hollandia 100 combines a modern design with technical flair, opening up open-air comfort to you at a low price.

Mode of operation:  
pop-up roof

## Hollandia 300

**A super view! Even for strongly arched cars.**

Due to its variability and its attractive appearance, the Hollandia 300 is one of Webasto's most popular sunroofs. With its two different sizes, it can even be used with strongly arched cars.

Mode of operation:  
tilt and slide roof

## Hollandia 400

### The highlight for your car!

With the Hollandia 400, you can experience what it is like to drive a convertible. This sporty folding roof can be opened as you see fit: from a narrow gap to a completely open roof.

Mode of operation:  
folding roof

## Hollandia 500

### The new dimension in comfort.

The huge panoramic roof stands out with its elegant look and its technical details. Whether fixed or movable: The two glass panels can be combined as you like. As a result, your rear-seat passengers will also enjoy more light and fresh air.

Mode of operation:  
panorama roof

# Top models: design, comfort and quality.

## Hollandia 700

### Discreet and elegant.

The elegant Hollandia 700 is integrated into the roof so well that it cannot be distinguished from a roof that is installed ex works. Perfectly adapted to the vehicle interior, the sun visor completes the noble design.

Mode of operation:  
integrated tilt and  
slide roof

## Hollandia 900

### There's none larger.

The Hollandia 900 attracts attention and provides comfort. The rear glass surface can be opened completely, while the forward glass panel acts as a wind deflector. The advantage is minimal development of draughts and noise, even at high speeds.

Mode of operation:  
integrated tilt and  
slide roof

## *Tried-and-tested quality.*

Webasto roof systems undergo internal endurance tests at the factory in order to prove their uniformly high standards in terms of weathertightness and the ability to withstand stress. In a wide variety of test series, the individual roofs are subjected to, among other things, steady rain, extreme stress, arctic weather conditions and strong soiling.

Professional installation represents a further column in Webasto's philosophy of quality. This is carried out solely by highly qualified partners who are certified regularly in training sessions and who undergo further education.

The detailed test series and the excellent training of our partners make it possible for us to provide you with top Webasto quality; this is confirmed regularly by the German TÜV testing authority. Make your decision for the number-one provider of car roof systems in the world, and look forward to the 3-year warranty.

## *So that you can keep safe.*

Webasto roof systems stand not only for excellent quality, but also for exceptional safety. Technical features such as the Auto-Close system, the Auto-Retract system or the Protective Venus® glass ensure safe and carefree driving pleasure:

### **Protection from surprises.**

The Auto-Close system automatically closes your roof when you park your car. Rain, dirt and undesirable visitors stay outside.

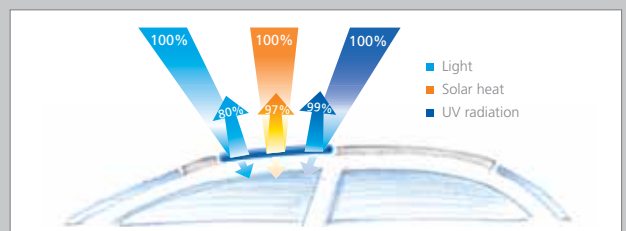

### **Protection from mishaps.**

The Auto-Retract system prevents your roof from closing if the opening is not completely free. This makes it impossible to catch things, such as hands.

### **Protection from UV radiation.**

The tinted Protective Venus® glass reflects UV radiation and solar heat without affecting the amount of incoming light.

Mode of operation: Protective Venus® glass

# Close at hand: operating elements and accessories.

Soft touch

Electrical

Manual

Rain sensor

## *Simple handling due to advanced technology.*

With every roof system, Webasto provides a number of operating units and accessories with clever functions, advanced technology and ease of use.

### **Soft touch.**

Operate your Webasto roof system with just a gentle touch. The two programmable favourite positions and the One-Touch function for quick opening/closing can be operated easily with one finger.

### **Electrical operation.**

Use one of our two different electrical operation options to reliably bring your Webasto roof system into the position you want. The integrated lighting permits simple operation even at night.

### **Manual operation.**

Simple and practical – the two manual-operation models from Webasto: hand crank and latch. Ergonomically shaped handles make their use child's play, and the opening positions can be set individually.

## *Accessories that think for themselves.*

### **Rain sensor.**

Park your car with the sunroof open – without worrying about surprises caused by the weather. The infrared sensor immediately detects rainwater and activates the automatic closing system.

## *Comfort down to your fingertips.*

With its internationally comprehensible icons, the new Hollandia 700 operating element permits user-friendly, simple control of the roof system.

Due to its elegant design and particularly smooth material, this operating element stands out with two models. While the entry version is available only in black and includes the standard Open/Close function, the comfort version has a few extra highlights: Auto-Close and Soft touch functions for easier Open/Close operation, three different designs and stylish LED lighting in selected colors.
